SPORTS VENUE PADDING (SVP) worked closely with Co-Ha Builders to renovate the entire University of Hawaii's RWSS softball stadium with new protective padding February of 2018, and upgrade the Les Murakami Baseball stadium padding. The administrators selected a deep forest green long-term outdoor vinyl that made their digitally printed green and white "HAWAII" logo and white distance markers "pop" off the outfield wall. The graphics were strategically placed to compliment a captivating "H" in their new artificial turf. The stadium received a much-needed facelift with padding along their baselines, right and left foul lines, and backstop - which highlights a graphically printed jagged "H" on the left and right side of the catcher. To complete the job, SVP installed hundreds of pads in all sizes - a combination of custom wood-backed L-shaped fence top padding, horizontal mid-rail padding, and flat post pads.

Additionally, SVP contracted with IPR Hawaii to upgrade the baseball field with 160 wood-backed wall pads in a variety of sizes, two digitally printed "HAWAII" logos, five distance markers, and welded right and left foul lines.

As the industry leader in protective padding for indoor and outdoor sports stadiums, **SPORTS VENUE PADDING** manufactures and installs field padding designed to protect players while maintaining a beautifully completed finish that is built to last. SVP services city parks, grade schools, colleges, MILB, and over 70% of the MLB ball parks.
